

Changing Lives

Changing lives; what survives? Listen to the heart of us
Changing lives; what survives? Just turn the neg to plus

Life's not what you haven't got. Life is what you have.
Throw the minus; take the plus. Have a look at us.
We're as we are before you, by choice and yes, by fate.
Some can't walk or talk but we can send a message, mate.

Changing lives; what survives? Listen to the heart of us
Changing lives; what survives? Just turn the neg to plus

Focus on your fortunes; those you have & trust
Beware of all misfortunes; there for all of us
I ask you just to ponder what legacy survives
As your contribution is already changing lives

Changing lives; what survives? Listen to the heart of us
Changing lives; what survives? Just turn the neg to plus

Find your life's direction. It's illusive, changing form
But trust the hand of Fate, 'Cause that mate can be reborn
Find your life's direction. It's illusive, changing form
But trust the hand of Fate. 'Cause that mate can be reborn

Steer it, changing gears and mate, pause, evaluate.
Truckin' down that road, it's so easy to learn
That there's riches around each corner,
each corner that you turn.
Find your life's direction.

Watch the lights; Listen to the heart of us
Beware of all misfortunes; there for all of us
I ask you just to ponder what legacy survives
As your contribution is already changing lives

Changing lives; what survives? Listen to the heart of us
Beware of all misfortunes; there for all of us.
I ask you just to ponder what legacy survives
As your contribution is already changing lives
Changing lives; what survives? It's illusive, changing form.
